

Gonorrhea

Gonorrhea is one of the most common sexually transmitted infections in the world. Symptoms can include sore or tender testicles, a burning pain on passing urine, yellow discharge from the penis and irritation and discharge from the rear end. If you have it in your throat you will experience difficulty in swallowing food. Quite often, though, you won't even know it is in these areas. Sometimes you can be infected and show no symptoms.

Treatment

Fortunately treatment is straightforward and involves antibiotics.
